

**North Yorkshire
Compact Development Day
15th May 2009**

Resolving disputes with the Compact

Funding scenario – Local Authority

You need to review the way you allocate funding through a particular funding stream and are aware that this fund has been available for 10 years to a number of third sector organisations.

During the process you are aware that it is likely that you will have to reject some applications for projects which would previously been funded through this stream as the review means that the criteria will need to be changed.

How might the North Yorkshire Compact help you to ensure that your organisation gets the best possible outcome?
